Four repeats, three different ions

identical composition; separated only by the filter (fig. 3)

CACNA1C	0 aa
CACNA1G	0 aa
SCN5A	0 aa
NALCN	0 aa

A Ca2+-selective TRP and its non-selective sister

same accessions, same length band, ~100-fold apart in P_Ca/P_Na

TRPV6	0 aa
TRPV1	0 aa

Inside one family, on both sides of the boundary

Ca2+-permeable and Ca2+-activated-but-impermeable; no sequence discriminator is known

TRPM7	0 aa
TRPM4	0 aa

One domain, three families

PF08016 spans TRPML, TRPP and a protein that is not a pore

MCOLN1	0 aa
PKD2	0 aa
PKD1	0 aa

A pore, a gate and a sensor

all three are 'store-operated calcium' hits and one is a channel

ORAI1	0 aa
STIM1	0 aa
CALM1	0 aa

Calcium in the name, not in the pore

a K+ channel, a pump, a GPCR, and an AMPA-receptor subunit

KCNMA1	0 aa
ATP2A1	0 aa
CASR	0 aa
CACNG2	0 aa
